

America: The Great War 1914-1916 (America, Great Crises In Our History Told by its Makers Book 11)

This volume deals with the first half of the Great War, 1914-16. To help you understand the wars origins, youll read letters and telegrams between Emperor Franz Josef, Kaiser Wilhelm, the Czar of Russia and the King of England. Theyre followed by an eye-witness report of Germanys ultimatum to Belgium, and accounts of critical events by Winston Churchill, Georges Clemenceau, Sir Edward Grey and Brand Whitlock, the American Minister to Belgium. There are accounts of the battles of Mons, Ypres, and Verdun; reports of naval conflicts at the Falklands and Jutland; Marshal Joffres review of the Marne campaign; Admiral Graf von Spees account of a sea fight near Chile; and Lord Kitcheners report of the Gallipoli disaster. The sinking of the Lusitania is described by an American survivor and a German U-boat commander, the execution of Edith Cavell by a British chaplain who witnessed it. Finally comes the Memorandum approved by President Wilson proposing American intervention in the war. Introduction To The Series After youve heard two eyewitness accounts of an auto accident, you begin to worry about history. This observation, attributed to the comedian Henny Youngman, summarizes the dilemma you face when you want to find out what really happened in the past. When you read a history book, the facts are actually the authors own interpretation, often colored by a conscious or unconscious wish to have you share a particular point of view. Youre one step (or many steps) removed from the original source material. Thats why the Veterans of Foreign Wars of the United States compiled this 12-volume collection of writings of people who actually witnessed the key events in American history - the actual actors in the events or contemporary observers of them. Past historians have spent decades locating, studying and consulting vast amounts of material such as

this. This meticulously chosen selection brings you the essence of history as originally recorded by those who participated in it. You'll be reading mostly eye-witness accounts, by people contemporary with the events they describe, including many significant historical figures themselves. So you can make your own assessments, draw your own conclusions and gain an understanding of past events undistorted by the prejudices, assumptions and selectivity of professional historians. In some instances where there aren't reliable or easily accessible eye-witness accounts, the compilers have chosen extracts from objective, authoritative historians of past generations such as Francis Parkman whose judgements have stood the test of time. Through these accounts, your knowledge of American history will be immeasurably greater, your understanding of the key events in the building of the nation immensely increased. Founded in 1899, the Veterans of Foreign Wars of the United States (VFW) is a nonprofit organization dedicated to foster camaraderie among United States veterans of overseas conflicts, from the Spanish-American War to Iraq and Afghanistan, and to ensure that they receive due respect and entitlements for the sacrifices they and their loved ones have made on behalf of the nation. With this mission, the VFW has a natural desire to encourage a broad understanding and appreciation of American history, and this essential collection of historical documents makes a huge contribution to that aim. This reissue was scanned, formatted and converted to e-book format with the permission and encouragement of the VFW, to make the series more accessible to a wider public. The VFW receives 50% of all royalty revenue from these e-books. This book is about 300 print pages.
