

## Researching Japanese War Crimes Records

This work makes it possible for the public to access a wide variety of documents related to Japanese war crimes committed in Asia and the Pacific. Noteworthy is the fact that the previously declassified documents corroborate much that is already known about Japan's wartime record. Furthermore, the material goes beyond the subject of war crimes and provides a wealth of historical information about the Axis nations. The range of Japanese-related documents, U.S. government as well as translated and original Japanese documents, merits extensive exploitation by academics, researchers, writers, veterans, and others interested in history. The files are filled with stories that need to be told.
