

## Outback: The Discovery of Australias Interior

In 1800, while the coast of Australia had finally been charted, the vast interior of the continent, and routes across its deserts and mountains from north to south and east to west lay all undiscovered. By 1874, its lands had been all but won. Derek Parkers new and exciting book gathers together the stories of those intrepid explorers who, often against great odds, on journeys of months or even years, beat starvation, inadequate information and mapping, disease and loss, to forge a route which would enable the countrys development. Illustrated by portraits, contemporary sketches and documents, and maps, this is a collection of tales of courage and determination despite overwhelming odds.
