

How Our Government Spending Is Effecting Our Mentally Ill and Our Future: A Personal View

There are several different ways that the American Government spends our tax payers monies without us knowing about it. Some of this Government spending is ridiculous when looking at the bigger picture of what is actually going on in the United States. The mentally ill need more help and that can only be met by Community Mental Health (CMH) receiving more monies. If that was to happen there could be less false complaints to Child Protective Services (CPS) and also less monies put into the Criminal Justice System. There are several inmates in our prisons and jails that are mentally ill and not receiving the treatment that they need, which leads to more recidivism.
