

The Obama Foreign Policy Disaster

Over the past five years, America has been little more than a spectator to a perilous global breakdown. Under President Barack Obama, the United States has failed to pursue its interests, stand up for its values, reassure its allies, and intimidate its antagonists. As a result, industrial-scale killing has gone unpunished, Islamist terrorists have declared statehood, our worst enemy has pulled within striking distance of a nuclear bomb, and Europe stands on the brink of war. The Obama Foreign Policy Disaster, featuring articles by Bret Stephens, Elliott Abrams, Bill Gertz and others from the pages of Commentary magazine, details the failures of American leadership in the Obama age and finds the cause of our present danger in the very ideology of the 44th president.
