

The Undivided Past: Humanity Beyond Our Differences

[MP3CD audiobook format in vinyl case.] From one of our most acclaimed historians comes an account of human solidarity throughout the ages, provocatively arguing against the received wisdom that history is best understood as a chronicle of groups in conflict. Investigating the six most pervasive categories of human difference - religion, nation, class, gender, race, and civilization - Cannadine asks how determinative each of them has really been over the course of history. Without denying their power to motivate populations dramatically at particular moments, he reveals that in the long term none has proven remotely as divisive as the occasional absolutist cries of us versus them would suggest, whether Christian versus Muslim during the Crusades (and now), landed gentry versus peasantry during the Bolshevik Revolution, or Jews versus Aryan race in Nazi Germany. For most of recorded time, these same unbridgeable differences were experienced as just one identity among others; whatever most chroniclers, self-serving mythmakers, and demagogues would have us believe, history needs to be reimagined to include the countless fruitful interactions across these lines, which are usually left out of the picture.
