

# To My Countrymen: The Essential Handbook for Tea Partiers, Occupiers, and Every American Who is Mad as Hell and Isn't Going to Take It Any More

We have it in our power to begin the world over again. - Common Sense, by Thomas Paine But time is running out. With a Presidential election in plain sight pitting the two most reviled Presidential candidates in anyones lifetime against each other, one can only wonder: how can things get any worse? But just wait! One of these polarizing figures will be elected President (God help us all!), and then he or she will have to deal with Congress, a Congress that all by itself is a catastrophic failure, a Congress with an approval rating that has hovered near 10% for years, the lowest approval rating since they began to rate Congress 41 years ago, a lower approval than any President has ever suffered. Worse yet, for how much the American people distrust their elected leaders, most of them will be re-elected! And as a final insult to our collective intelligence, if President Obama (considered at least by Republicans the most polarizing figure ever to inhabit the White House) were allowed to run for the Presidency again, he would win in a landslide! Donald J Trumps supporters are angry. Bernie Sanders supporters are angry. They represent nearly half of the electorate. What are they all angry at? Our national government: what it is doing and what its not doing. If you are not angry, you may be part of the problem (a member of the plutocracy) or you havent been paying attention. What the hell is wrong? And what can we do to fix it? Hundreds of books have been written to answer these questions. But most of these books sing to the choir: experts, politicos, policy wonks, and insider types living in the Beltway (and authors of books like this one). Their solutions Congress should do this and that dont begin to explain how or why an angrily divided Congress would ever do that! What we do know about Congress is that it has stopped doing the peoples business. What the hell is wrong? And

what can WE do to fix it? To My Countrymen was written from page one with real Americans in mind; YOU, the regular American who loves his country, are this book's audience. The solutions it proposes are things that we must do because the President and Congress won't; they have their business, and it ain't We the People's business. We live in a democracy, right? We the People rule! We are in charge. So, what are YOU going to do about the mess? Read To My Countrymen. Get on board.
