

Europe, the Highlands and Me: Essays and travels

James Miller travels around northern Europe, delving into connections between his home country, the north of Scotland, and the places he visits. The result is a series of lively, sometimes whimsical, serious but never solemn essays on various journeys with digressions into history, the relations between the Highlands and the neighbours, and the present status and future of the European Union. An amusing and thought-provoking read for all who are interested in Europe and the EU today. A new chapter has been added to update the text after the 2014 elections for the European Parliament.
